Please amend claim 1 as follows:

1. (Amended) A method of correcting the refractive error in the cornea of an eye, comprising the steps of

heating the cornea to loosen the molecules therein, thereby softening the cornea into a gelatinous material;

reshaping the gelatinous material, so that it substantially conforms to a predetermined pattern; and

cooling the reshaped gelatinous material to maintain it in the predetermined pattern;

wherein the reshaping step takes place without subjecting the cornea to a vacuum.
